Why WAXING...??

- EFFECTIVE
- FAST
- ECONOMICAL
- LOW-COST INVESTMENT
- SIMPLE APPLICATION
- USING NON-BACTERIAL CONTAMINATED MATERIALS

The New Generation of WAXING Concept

It's not just about "hair-removal" ...

we have to consider the condition of the skin also!

"SKIN-CARE WAXING" Concept

- Pre-Waxing preparation of the skin
- Post-Waxing treatment of the skin
- QUALITY OF THE WAX :
 - Different kind of waxes for different kind of hairs
 - Ability of removing hairs to the shortest hair
 - Elasticity , the wax ability to make thin application
 - Low temperature
 - Less Pain
 - Good Waxing Techniques → Need TRAININGS

Pre Waxing Advice

- 1. Scrub the day before coming in for a wax for clients with ingrown hair
- 2. No sun burned skin
- 3. No cuts and wounds
- 4. Do not wax when sick
- 5. Do not come with full makeup
- 6. Please remove all jewelry like nose rings.

Post Waxing Care

- Cleanse with a multi-purpose cleanse to remove excess wax from the newly waxed area.
- Do not scrub the skin for 24 hours.
- Do not go into the sun or swim immediately, allow 24 hours for skin to recover, to prevent pigmentation and any reaction to the chlorine water. Use Sun Block.
- Do not go into steam bath or sauna immediately as the skin may react to the heat.
- Do not wear makeup immediately on newly waxed skin, may cause pimples.
- Do not massage the area after waxing.
- Apply moisturizer day & night to prevent skin peeling or dryness.
- Mask the skin with a moisturizing mask to improve skin tonity.

No more Torture Dungeons

NOT ALL WAX IS CREATED TO BE EQUAL
